Operations Research Letters 14 (1993) 297–298
North-Holland

December 1993

Author Index to Volume 14 (1993)

The issue number is given in front of the page numbers

Amado, L. and P. Barcia, Matroidal relaxations for 0–1 knapsack problems (3) 147–152
Armstrong, R., *see* Lei, L. (2) 91– 98
Atkins, D. and S. De, A performance bound on single cycle lot-sizing policies for an assembly system with stochastic demand (5) 265–273
Avramidis, A.N. and J.R. Wilson, A splitting scheme for control variates (4) 187–198
Badrinath, V., *see* Mazumdar, R. (1) 19– 24
Barcia, P., *see* Amado, L. (3) 147–152
Brucker, P., B. Jurisch, T. Tautenhahn and F. Werner, Scheduling unit time open shops to minimize the weighted number of late jobs (5) 245–250
Carrizosa, E., E. Conde, F.R. Fernandez and J. Puerto, Efficiency in Euclidean constrained location problems (5) 291–295
Chao, X., *see* Chen, H. (4) 199–206
Charnes, A. and M. Kress, Two simple applications of the unimodularity property (5) 257–260
Charon, I. and O. Hudry, The noising method: a new method for combinatorial optimization (3) 133–137
Chen, B., A note on LPT scheduling (3) 139–142
Chen, H., P. Yang, D.D. Yao and X. Chao, Optimal control of a simple assembly system (4) 199–206
Cheng, D.W., Concavity of system throughput and information transfer in a PAC system (3) 143–146
Conde, E., *see* Carrizosa, E. (5) 291–295
Contaldi, G., G. Di Pillo and S. Lucidi, A continuously differentiable exact penalty function for nonlinear programming problems with unbounded feasible set (3) 153–161
Cregger, M.L., *see* Vasko, F.J. (5) 275–282
Dan, N.D., *see* Tuy, H. (2) 99–109
De, S., *see* Atkins, D. (5) 265–273
Di Pillo, G., *see* Contaldi, G. (3) 153–161
El-Taha, M., *see* Stidham Jr., S. (1) 1– 7
Fernandez, F.R., *see* Carrizosa, E. (5) 291–295
Friedman, E.J. and A.S. Landsberg, Short run dynamics of multi-class queues (4) 221–229
Ghannadan, S., *see* Tuy, H. (2) 99–109
Gu, S., *see* Lei, L. (2) 91– 98
Guillemin, F., *see* Mazumdar, R. (1) 19– 24
Hlynka, M. and T. Wang, Comments on duality of queues with finite buffer size (1) 29– 33
Hudry, O., *see* Charon, I. (3) 133–137
Imielińska, C., B. Kalantari and L. Khachiyan, A greedy heuristic for a minimum-weight forest problem (2) 65– 71
Jaillet, P., Rate of convergence for the Euclidean minimum spanning tree limit law (2) 73– 78
Joglekar, P. and P. Lee, An exact formulation of inventory costs and optimal lot size in face of sudden obsolescence (5) 283–290
Jurisch, B., *see* Brucker, P. (5) 245–250
Kalantari, B. and L. Khachiyan, On the rate of convergence of deterministic and randomized RAS matrix scaling algorithms (5) 237–244
Kalantari, B., *see* Imielińska, C. (2) 65– 71
Khachiyan, L., *see* Imielińska, C. (2) 65– 71
Khachiyan, L., *see* Kalantari, B. (5) 237–244
Kim, S. and B.-s. Um, An improved subgradient method for constrained nondifferentiable optimization (1) 61– 64
Kress, M., *see* Charnes, A. (5) 257–260
